

# HANDHELD SOLUTION FOR MOBILITY

The Arcus handheld options are all designed for ease of use and ergonomics. They are fully integrated with barcode scanner, RFID reader and antenna. They connect directly to the Arcus cloud using a local wi-fi network to provide you comprehensive stocktake capability and searching for missing items. This means you can access the results anywhere, anytime. It is quick and easy to export selected data. The main features:

- Detecting items in either HF or UHF
- Uploading a batch of items
- Locating a batch of items
- Automatic data uploading and analysis
- Automatic report generation for missing items and items not found in database
- CSV output for further processing

## Technical Specifications

Dimensions	Various - approx 185 x 85 x 30 mm	RFID Frequency	HF - 13.56 MHz, UHF - 860 - 960Mhz based on regulatory region
Weight	Various - approx 500g	Protocol	ISO 15693, ISO-18000-6C (EPC Class 1/Gen2), works with all Gen2 compliant (ISO-18000-6c)
Display	Various - ~ 4" touch screen	Read Range	HF - Approx. 0.2m, UHF - Approx 1.0m
Operating System	Android	Barcode	Integrated barcode scanner supporting 1D/2D
Interfaces	Web Services or OEM, Arcus Mobile		

## ARCUS IS MOVING

Adilam is a leading RFID, IoT and vision systems provider. With a global network of technology partners, and a highly skilled team of engineers, we provide a range of hardware and software solutions. These solutions are deployed on the world's first cloud based RFID application platform, Arcus—a rapid deployment platform managing the core elements of people, assets, inventory and movement and layered with custom built applications for each clients needs.
